NET ETIQUETTE

13th Legion — Training Reference

Comms Basics · Training Block 3 · 2026

This is how you talk once you have the station. Who is on which net, and how you keep it secure, is **Radio Familiarity**. What you send is **Reports**.

Prowords are short standard words with one agreed meaning, used across all units. They make traffic readable and they cut down on "say again" loops. The standard for the words you choose is the 3 C's: **Clear, Concise, Correct**.

1. PROWORDS

PROWORD	MEANING
BREAK	Pause. More of the same message is coming. Unkey while you pause.
OVER	I am done talking, and I am expecting a response.
OUT	End of the transmission. I am done talking. Do not respond.
CORRECTION	Corrects a misheard message.
ROGER	Confirms receipt of the message.
SAY AGAIN	Ask the sender to repeat the last transmission.

NEVER SAY "REPEAT". Say again. And never say **"over and out."** Over asks for an answer. Out says do not answer. Together they contradict each other, and the block calls it redundant for that reason.

2. TERMS

Say the abbreviation, or the phonetic the block gives, and mean that thing only.

TERM	MEANING
RP	Rally point
AO	Area of operation
FOB	Forward operating base
TOC	Tactical operations center
PL	Phase line — Papa Lima
LD	Line of departure — Lima Delta
LOA	Limit of advance
OM	On mission — Oscar Mike
CM	Continue mission — Charlie Mike
NAI	Named area of interest
RTB	Return to base
Prowords	Procedure words

3. ESTABLISHING CONTACT

The call is: **"Hey YOU, this is ME, over."** Their callsign, then yours, then over.

- **Do not relay the information until they answer.** Contact first. The report second.
- No answer: **wait 30 seconds** and try again.
- Still no answer: **wait 2 minutes** and try again.
- If that fails, stop mashing the button. Troubleshoot the radio — line of sight and terrain, antenna height, foliage, transmit power. That checklist is in Radio Familiarity.

4. RUNNING THE CONVERSATION

YOU SAY	YOU MEAN
Over	Expecting a response. Stop talking.
Break	More information follows. Unkey for each break.
Out	End of the conversation. They do not answer.

EIGHT SECONDS. A transmission should be no more than 8 continuous seconds. That is why a LACE report is sent as Lima, break, Alpha, break — not as one breath. Unkey on the break.
